

COMING UP IN THE
MODERN HOMESTEADING WORKSHOP SERIES

JUNE 22

**Composting: Soil - The Soul
of Organic Farming**

Learn about the composting process and receive helpful hints as the Ecosystem Farmer highlights the Foundation's composting program. Participants will build a simple "cage" composter during the workshop, learn about worm composting and help construct the 3-bin system we will use to compost food waste on-site.

JULY 27

**Nature's Bounty:
Food Foraging and Wild
Edible Plant ID**

Walk the trails at Accokeek Foundation and learn how to identify edible plants growing in the wild. Participants will help to create a mushroom orchard on the farm.

AUGUST 17

**Hugelkultur: Reshaping
the Land to Create
Microclimates**

Often employed in permaculture systems, hugelkultur allows gardeners and farmers to mimic the nutrient cycling found in a natural woodland to realize several benefits like retaining moisture on site, build soil fertility, improve drainage, and find a use for that woody debris that is often unsuitable for other uses.
